

Every lower theory has two branches, related by mirror symmetry

In 3D: Coulomb branch and Higgs branch

Tip 5: Puns!

Every lower theory has two branches, related by mirror symmetry

In 3D: Coulomb branch and Higgs branch

Tip 5: Puns!

- **Math:** Each twist carries spacetime into a different target manifold
- **Tree:** Each branch carries the trunk into the leaves
- “Spring” side is mirror to “autumn” side
