

How can you visualize things which don't fit on a page?

Here are some regimes:

Literal:

How do you draw a high dimensional manifold?

Abstract:

How can you put a face on a mathematical abstraction

Cartographic:

How do you map the landscape of a field of math?

Tip 8: Use real world hierarchies

- Establish relationship between math objects with real world analogies
- Hijacks human worldly understanding

The group is the *Tree*
The algebra is the *Roots*
