

- **Math:** Each target maps into the one above as a “boundary condition”
- **Tree:** Fungi map each leaf blob to the one above
- Target manifests differently in different layers

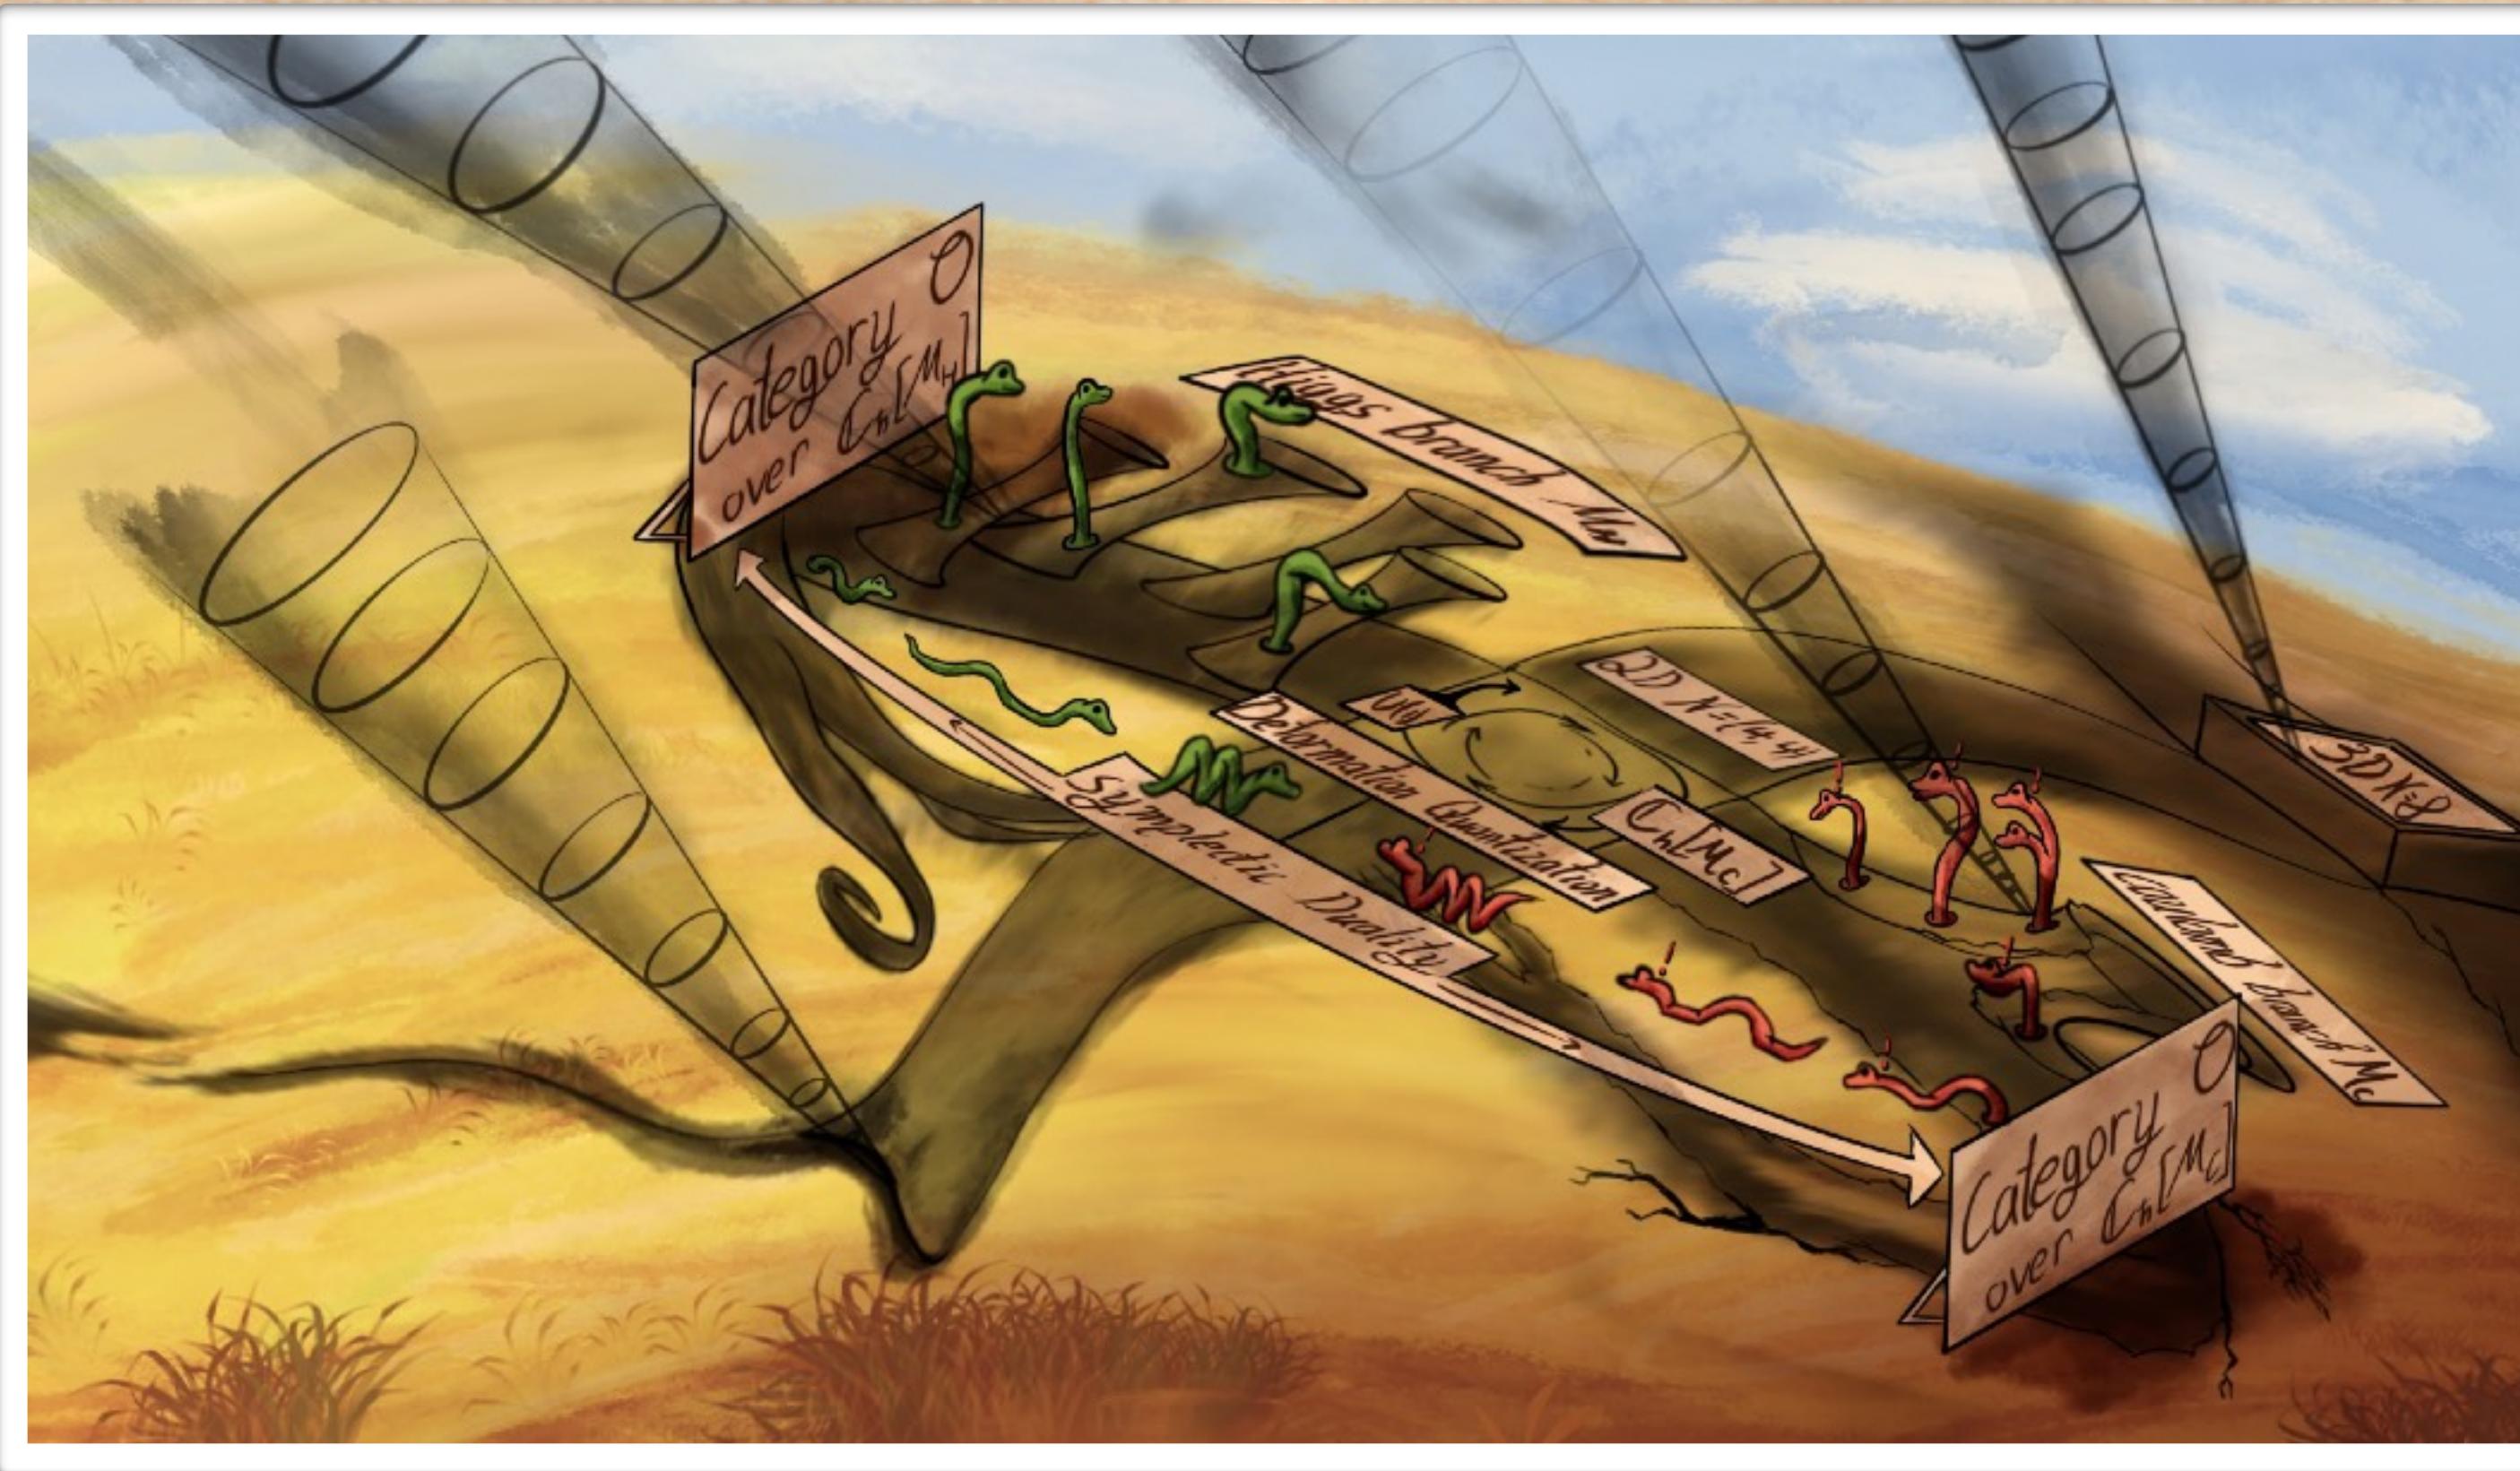

Tip 3: Semantic slices

- **Math:** Each target maps into the one above as a “boundary condition”
- **Tree:** Fungi map each leaf blob to the one above
- Target manifests differently in different layers

Tip 3: Semantic slices

Tip 8: Hierarchies

- **Math:** “dimensional reduction” projects theories to lower dimensions
- **Tree:** dimensional reduction is the shadow
